Keyur Vaghela

Ahmedabad, Gujarat | +91 90161 60151 | keyurvaghela62@gmail.com

PROFESSIONAL SUMMARY

Junior Web Developer with **1+** year of experience in building web applications using PHP, Laravel, React.js, and MySQL. Skilled in developing secure authentication systems, RESTful APIs, and responsive user interfaces. Strong problem-solving skills with expertise in MVC architecture and modern web technologies.

TECHNICAL SKILLS

• Languages: PHP, HTML5, CSS3, JavaScript

• Frameworks & Libraries: Laravel, Bootstrap, React.js

• Databases: MySQL

• Tools: Git, VS Code, Postman

• Others: RESTful API, JSON, Ajax

PROFESSIONAL EXPERIENCE

Swizzdigi Pvt. Ltd. – Ahmedabad

Role: Web Developer (Internship)

• Worked on PHP and Laravel-based Website during internship, gaining hands-on experience in backend development, RESTful APIs, and database management.

Erience Solutions – Ahmedabad

Role: Junior Web Developer (PHP, Laravel, React) | Sept 2023 – Present

• Developed and maintained web applications using PHP, Laravel, and React.js.
• Integrated secure authentication and RESTful APIs.
• Built responsive front-end interfaces and optimized database queries.

COMPANY PROJECTS

➢ Hotel Food Website (Delhi House)

 • This project is a **hotel food ordering and table booking system** where users can log in to browse the food menu, place orders for home delivery, or reserve tables for lunch and dinner. The system supports coupon discounts, either percentage-based or fixed rate, and automatically calculates delivery charges based on the user's area using their pincode. Admins can manage food items, coupons, delivery areas, and oversee all orders and bookings.

➢ CRM System

•Developed a CRM web application for *Erience Solutions* with secure Google Authentication and core CRM modules (People, Leads, Business) to manage client and sales

data. Built using Core PHP (OOP), MySQL, HTML, CSS, and JavaScript, the system ensures real-time operations, user-friendly interfaces, and secure data management..

➢ Daily Report Web Application

•Developed a Daily Report Admin Panel using Core PHP, MySQL, HTML5, CSS3, and JavaScript with secure login, employee dashboards for submitting daily work reports, and an admin-controlled notes feature. Integrated automated notifications to Mattermost and company email for employees who fail to submit reports, ensuring accountability and efficient activity tracking.

➢ KYC Project

• Developed a KYC application with React.js and Node.js, featuring web scraping for company and director details, ISIN data lookup (NSE, BSE, NBFC), and secure data handling using MySQL, Puppeteer, and REST APIs.

➢ AGM Management System

• Developed a web-based AGM management system with secure login, meeting scheduling, Google Meet integration, and automated invitations. Implemented YouTube live-streaming/recording, attendance tracking with join/leave times, shareholder participation records, downloadable reports, and a user dashboard for managing past and upcoming meetings.

EDUCATION
